DIGITAL MARKETING PROJECT 1

Social Media Content Planning

Project Type	Industrial Training / Practical Project
Business Selected	Digital Marketing Agency
Prepared By	Saurabh Singh
Course	BBA
Batch	2026
Project Focus	Audience Mapping, Content Planning & Posting Schedule

Prepared according to the Project 1 brief, which asks the learner to create a simple social-media content plan, identify the target audience, plan post ideas, and create a basic posting schedule.

1. Executive Summary

This project develops a practical social media content plan for a Digital Marketing Agency. The plan is designed to turn marketing objectives into consistent, useful and audience-focused social content. Instead of depending only on viral trends, the strategy uses clear audience segments, content pillars, repeatable formats and a structured monthly calendar.

The agency will use social media to build awareness, demonstrate expertise, generate qualified enquiries and maintain relationships with existing prospects and clients. Instagram and LinkedIn are treated as primary channels, while Facebook supports wider reach and community communication.

The final plan contains audience personas, content objectives, platform strategy, content pillars, post ideas, sample captions, a 30-day calendar, hashtag guidance, engagement tactics, KPIs and an implementation checklist.

2. Project Objectives

Objective	How the plan addresses it
Brand Awareness	Increase visibility among small businesses, startups and professionals who need digital marketing support.
Audience Engagement	Encourage comments, saves, shares, replies and direct conversations through useful and interactive content.
Lead Generation	Move interested followers toward enquiry forms, DMs, consultations and discovery calls.
Authority Building	Show practical expertise through educational posts, case-style content, tips, frameworks and results.
Consistency	Maintain a predictable publishing rhythm so the brand remains visible without posting randomly.

3. Business & Brand Profile

Selected business: Digital Marketing Agency. For this academic project, the agency is treated as a professional service business that helps clients with social media marketing, content creation, search visibility, paid campaigns, lead generation and digital strategy.

Brand positioning: “A practical growth partner for businesses that want measurable digital results.”

Brand voice: Professional, helpful, clear, confident and approachable. Avoid unnecessary jargon. Explain marketing concepts in simple language and support claims with examples wherever possible.

Core service categories:

- Social Media Management
- Content Strategy & Creative
- Search Engine Optimisation (SEO)
- Performance Marketing / Paid Ads
- Lead Generation
- Analytics & Reporting

4. Target Audience Identification

The content plan follows the brief’s requirement to identify the target audience. The primary audience is made up of decision-makers who either need marketing support or want to improve their own digital skills.

Segment	Profile	Need / Pain Point	Content Response
Small Business Owners	Age 25–45; local/service businesses; owner-led decisions	Inconsistent leads, weak online presence, limited time	Simple marketing tips, local marketing ideas, lead-generation examples
Startup Founders	Age 22–40; early-stage teams	Need awareness, traction and efficient customer acquisition	Growth frameworks, content strategy, funnel explainers
Marketing Managers	Age 25–45; SMEs and growing companies	Need reliable execution, reporting and campaign ideas	Advanced tips, KPIs, campaign checklists, case-style posts
Students & Freshers	Age 18–25; marketing learners	Need practical skills and portfolio guidance	Career tips, terminology explainers, mini projects, tools
Existing / Warm Leads	People who have interacted with the agency	Need proof, clarity and confidence before enquiry	Testimonials, process explainers, FAQs, results and offers

5. Audience Personas

Persona 1 – Business Owner

Rohit, 34, owns a local service business. He understands that customers search online but does not have time to manage content. He wants affordable, understandable marketing and clear evidence of results.

Persona 2 – Startup Founder

Neha, 29, runs a growing startup. She wants brand awareness and qualified leads but needs a focused strategy instead of posting on every platform without a plan.

Persona 3 – Marketing Learner

Aman, 21, is a BBA student learning digital marketing. He wants practical examples, tools, templates and career-oriented guidance that he can apply in projects.

6. Social Media Platform Strategy

Platform	Primary Role	Best Content	Suggested Frequency
Instagram	Reach, engagement, visual education	Reels, carousels, Stories, polls, tips	4–5 feed posts/week + Stories

LinkedIn	Authority, B2B trust, professional leads	Text posts, documents, insights, case-style posts	3 posts/week
Facebook	Community, reach and retargeting support	Repurposed posts, videos, offers, community questions	3 posts/week

The same core idea can be adapted for each platform rather than copied word-for-word. For example, an Instagram carousel can become a LinkedIn document post, while a Reel can be converted into a short Facebook video.

7. Content Pillars

Pillar	Purpose	Example Topics	Share of Content
Educate	Build expertise and provide useful knowledge	SEO basics, content tips, ad mistakes, funnel concepts	30%
Engage	Create two-way communication	Polls, questions, myths vs facts, this-or-that	15%
Prove	Build trust with evidence and process	Case-style results, before/after process, testimonials	20%
Convert	Generate enquiries and action	Free audit, consultation, service explainers, offers	20%
Humanise	Make the agency relatable	Team, behind-the-scenes, work process, lessons learned	15%

8. Content Format Mix

Format	Use	Sample Hook
Carousel	Step-by-step education	“7 mistakes that reduce your social media reach”
Short Reel	Fast awareness and practical tips	“3 things to fix before running ads”
Static Graphic	Single insight or reminder	“Your content needs a goal, not just a design.”
Story / Poll	Quick engagement	“Which is harder: getting reach or getting leads?”
Testimonial / Case Post	Social proof	“What changed after we introduced a content system”
Offer Post	Lead generation	“Book a 20-minute digital growth audit”

9. Sample Post Ideas

1. Educational Carousel

Hook: “7 Social Media Mistakes Small Businesses Make.” Slides: weak bio, inconsistent posting, no CTA, too much promotion, unclear audience, no analytics, copying competitors. CTA: “Save this checklist.”

2. Reel – Quick Tips

Hook: “Before you boost your next post, check these 3 things.” Explain objective, audience and creative. CTA: “Comment AUDIT if you want a checklist.”

3. Myth vs Fact

Myth: “More hashtags automatically mean more reach.” Fact: relevant content, audience fit and engagement matter more than using random tags. CTA: “Share with a business owner.”

4. Case-Style Post

Show a fictional/academic example of how a business moved from irregular posting to a planned content system. Use process and learning rather than unsupported performance claims.

5. Founder Question

“If you had only 30 minutes a day for marketing, what would you focus on?” Invite replies and use comments to understand audience priorities.

6. Service Explainer

Explain what social media management includes: strategy, calendar, creative direction, publishing, community management and reporting.

7. Free Audit Offer

Offer a basic profile/content audit with a clear CTA: “Send us your website or social handle by DM.”

8. Behind the Scenes

Show the process of turning a business objective into a post: brief → audience → idea → copy → creative → review → publish → analyse.

10. Sample Captions

Caption A – Educational

Posting every day is not the same as having a strategy. Before creating your next post, ask: Who is this for? What problem does it solve? What action should the audience take? A simple content system can make your marketing more consistent and purposeful. Save this for your next planning session.

Caption B – Engagement

Let’s test your marketing thinking. Which one is the bigger challenge for your business right now: A) getting reach, B) getting engagement, or C) converting attention into leads? Comment A, B or C.

Caption C – Conversion

Not sure what your business should post this month? Start with your customer questions. We can turn those questions into a structured content plan with clear goals, formats and CTAs. DM PLAN to discuss your requirements.

11. 30-Day Social Media Content Calendar

Day	Platform	Format	Content Topic	Pillar	CTA
1	Instagram + LinkedIn	Carousel	What a content strategy actually does	Educate	Save
2	Instagram Stories	Poll	Biggest marketing challenge	Engage	Vote
3	LinkedIn	Text	3 reasons businesses need consistent content	Educate	Comment
4	Instagram	Reel	3 mistakes before running ads	Educate	Share
5	Facebook	Graphic	Marketing quote + practical lesson	Humanise	React
6	Instagram	Carousel	5 content ideas for small businesses	Educate	Save
7	LinkedIn	Question	What makes you trust a brand online?	Engage	Reply
8	Instagram	Reel	Content planning in 30 seconds	Educate	Follow
9	Facebook	Carousel	Basic social media checklist	Educate	Save

10	LinkedIn	Document	Lead generation funnel explained	Educate	Download/Save
11	Instagram Stories	Quiz	Marketing myth or fact	Engage	Answer
12	Instagram	Graphic	Content needs a goal, not just design	Humanise	Share
13	LinkedIn	Case-style	From random posting to planned posting	Prove	Comment
14	Facebook	Video	How an agency builds a content calendar	Prove	Message
15	Instagram	Carousel	7 social media mistakes	Educate	Save
16	LinkedIn	Text	3 KPIs every small business should track	Educate	Save
17	Instagram Stories	Poll	Which platform works best for you?	Engage	Vote
18	Instagram	Reel	1-minute SEO basics	Educate	Follow
19	Facebook	Graphic	Free profile audit announcement	Convert	DM
20	LinkedIn	Carousel	How to write a strong CTA	Educate	Try it
21	Instagram	Testimonial-style	What clients need before hiring an agency	Prove	Comment
22	Instagram Stories	Q&A;	Ask a digital marketing question	Engage	Ask
23	LinkedIn	Text	Common content planning mistakes	Educate	Share
24	Instagram	Reel	3 content ideas from customer FAQs	Educate	Save
25	Facebook	Carousel	Services: strategy to reporting	Convert	Enquire
26	LinkedIn	Case-style	Example campaign planning workflow	Prove	Message
27	Instagram	Graphic	Weekend marketing checklist	Humanise	Save
28	Instagram Stories	Poll	Would you use a free audit?	Convert	Vote
29	LinkedIn	Text	Monthly marketing reflection checklist	Educate	Save
Day	**Platform**	**Format**	**Content Topic**	**Pillar**	**CTA**
30	Instagram + LinkedIn	Offer	30-day content planning recap + consultation CTA	Convert	Book/DM

12. Weekly Posting Rhythm

Day	Theme	Primary Goal
Monday	Educational tip / carousel	Start the week with value

Tuesday	Story poll / question	Audience interaction
Wednesday	Reel / short video	Reach and awareness
Thursday	Professional insight / case	Authority and trust
Friday	Offer / service / proof	Lead generation
Saturday	Light, human or checklist content	Relationship building
Sunday	Q&A; / recap / planning prompt	Retention and feedback

13. Hashtag & Keyword Strategy

Use a small set of relevant hashtags and topic keywords instead of filling every post with unrelated tags. Combine broad category terms with niche and audience terms. Examples: #DigitalMarketing, #SocialMediaMarketing, #ContentMarketing, #SmallBusinessMarketing, #LeadGeneration, #MarketingStrategy. Platform-specific keyword placement should also appear naturally in captions, headings and on-screen text.

Hashtags should support discoverability, not replace strong content. Review performance monthly and keep the terms that attract relevant viewers rather than only high impressions.

14. Engagement Strategy

- Reply to meaningful comments promptly and continue the conversation with a question whereappropriate.
- Use Stories for polls, quizzes, Q&A; boxes and quick feedback.
- Turn frequently asked questions into future content pieces.
- Encourage saves and shares through checklists, frameworks and practical examples.
- Use clear CTAs matched to the post objective: save, comment, share, follow, visit, enquire or DM.
- Engage with relevant industry conversations from the agency account rather than relying only onits own posts.

15. KPI Measurement Framework

Objective	Primary KPI	Supporting Metrics
Awareness	Reach / impressions	Video views, profile visits, follower growth
Engagement	Engagement rate	Likes, comments, shares, saves, story replies
Lead Generation	Qualified enquiries	DMs, form submissions, consultation requests
Conversion	Lead-to-client rate	Booked calls, proposals, closed clients
Objective	**Primary KPI**	**Supporting Metrics**
Content Quality	Saves / shares per post	Average watch time, completion rate, repeat engagement

16. Basic Reporting Template

Week	Posts	Reach	Engagement	Leads	Top Content	Learning / Action
Week 1	—	—	—	—	—	Record baseline
Week 2	—	—	—	—	—	Compare formats
Week 3	—	—	—	—	—	Improve hooks/CTAs
Week 4	—	—	—	—	—	Select next month winners

The dashes are intentional: this is a planning project, so actual performance data should only be entered after publishing and measuring the content. This avoids inventing results.

17. Implementation Workflow

Step 1 – Brief
Define the business goal, offer and audience for the month.

Step 2 – Audience Mapping
Review customer problems, questions, objections and interests.

Step 3 – Content Planning
Select pillars and create ideas for each platform.

Step 4 – Production
Prepare copy, visuals, short videos and approval versions.

Step 5 – Scheduling
Assign publishing dates, formats and CTAs.

Step 6 – Community Management
Respond to comments, DMs and audience feedback.

Step 7 – Analytics
Track reach, engagement, leads and content-level performance.

Step 8 – Optimisation
Keep strong formats, improve weak hooks and update the next calendar.

18. Content Quality Checklist

1. Is the target audience clear?
2. Does the post solve a real problem or answer a real question?
3. Is the first line/hook easy to understand?
4. Is the visual readable on a mobile screen?
5. Does the post have one clear main message?
6. Is the CTA appropriate to the objective?
7. Are claims, numbers and examples accurate and supportable?
8. Has the post been checked for spelling, branding and links?
9. Has the content been scheduled for the correct platform and time?
10. Will the performance be reviewed after publishing?

19. Expected Outcomes

If implemented consistently, this content plan is designed to create three layers of value. First, educational content improves visibility and positions the agency as knowledgeable. Second, engagement and proof content builds familiarity and trust. Third, conversion-focused content gives interested audiences a clear next step. Actual outcomes should be judged from analytics rather than assumed in advance.

The project also creates a repeatable system. After the first 30 days, the agency can retain high-performing topics, remove weak formats, develop new audience questions and build the next monthly calendar using real performance data.

20. Conclusion

This Social Media Content Planning project converts the basic requirements of Project 1 into a complete practical roadmap. The plan identifies a target audience, defines content pillars, selects suitable platforms, develops sample post ideas and provides a structured 30-day schedule. It also introduces engagement methods and KPI tracking so content planning becomes measurable rather than random.

The central principle is simple: create content for a defined audience, give every post a purpose, publish consistently, and improve the plan using evidence. This approach supports the project's emphasis on strategic engagement and structured content planning.

21. Submission Note

This report is prepared from the supplied Project 1 training brief. The brief states that the project is the strategy phase for Social Media Content Planning and specifically requires target-audience identification, content ideas and a basic posting schedule. file cite turn0file0 L7-L19 file cite turn0file0 L31-L46

No fabricated campaign results, client results or analytics have been presented. Where the report uses examples, they are clearly framed as sample/academic content ideas.
